Invitation to the Conference: The Public Services' contribution to Smart, Sustainable and Inclusive Growth

Budapest, 16 – 17 June 2011

Dear Madam, Dear Sir,

CEEP would like to invite you to the conference it organises in Budapest on 16 and 17 June 2011 on the theme of "The Public Services' contribution to Smart, Sustainable and Inclusive Growth"

The EU is coming out of an important economic and financial crisis while, at the same time planning for its future with the Europe 2020 strategy and the re-launch of the internal market with the Single Market Act. More than ever, all forces should be used to ensure the fulfilment of ambitious goals and positive outcomes for citizens and the economy alike. Public Services are key for the success, but how can public services contribute to a smarter and more sustainable growth? How to ensure a proper functioning of the market with modern public services?

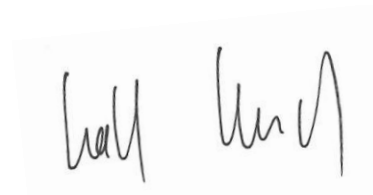

This conference will be an opportunity for policy-makers to share their views with CEEP members and partners on how to tackle the questions of financing public services, contributing to growth, mitigation of climate change, developing new skills, etc.

CEEP will also be celebrating its 50th anniversary during a gala dinner taking place in Budapest on the evening of 16 June.

The complete programme and the registration forms are enclosed.

Looking forward to welcoming you in Budapest, we remain

Yours faithfully,

Ralf RESCH
General Secretary of CEEP

Project co-funded by the EC
